DETAILED ACTION

1. This communication is in response to applicant's Request for Continued Examination (RCE) filed on March 16, 2007. Claims 1-15 and 21-26 are pending in this application.

Allowable Subject Matter

2. The following is a statement of reasons for the indication of allowable subject matter:

3. The prior art of record (Watson et al. US Pat. No. 5,978,780) teaches a computer-implemented information processing system that acts as a personal settlements exchange for the payment of household bills. The personal settlements exchange encompasses collection and consolidation of household bills into a single periodic statement, aggregation of payments to service establishments, and application of payments to service establishment individual household accounts, all by way of a database management, information processing, and communications system. Banks and service establishments enlist their customer accounts in the personal settlements exchange.

Even though the prior art of record teaches a computer-implemented information processing system performing the above mentioned steps. The prior art of record fails to teach a computer implemented method and corresponding system for billing and

payment, comprising the steps of determining, by a service provider, a credit risk associated with payment of the first bill on behalf of the first payor from an account associated with the service provider, and selecting, by the service provider, a debit type an account to debit from the group consisting of an account associated with the first payor and the account associated with the service provider based upon the determined credit risk, wherein the selection of the account is made independently of the first payor and the first biller, and initiating, by a service provider, a payment of the first bill to the first biller based on the received payment instruction and the selected account. For these reasons claims 1, 8, and 15 are deemed to be allowable over the prior art of record, and claims 2-7, 9-14 and 21-26 are allowable by dependency.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee, and to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled Comments on Statement of Reasons for allowance.
